

Did You Know?

Here at Kiddie Prep School our classrooms use something called
“The Creative Curriculum”.

The Creative Curriculum for Preschool is one of the most widely used Pre-K curricula in the nation. It’s research-based, comprehensive, and it features exploration and discovery as a way of learning.

In this week’s video we see kids using their skills to identify animals and the sounds they make while also interacting with their peers and their teacher.

Other friends are building with legos—showing off STEM skills to build a tall tower while also working with another friend.

Finally, a group of friends are working on their fine motor skills and letter and number composition and identification while also figuring out ways to learn the answer to a question they don’t know and answering higher level thinking questions.
