Establish Routines – At home, establish routines with kids. This should include bedtime, mealtime, and anything else that happens regularly during the day. When kids start kindergarten, whether they go to school or are homeschooled, they will need to know how to follow classroom routines in order to have a smooth and successful kindergarten day.

Sit Still – There are many hands-on and engaging activities that kids will get to do in kindergarten. Unfortunately, part of kindergarten must include sitting still and getting work done. Kids can prepare for this by working quietly at a table or desk on fun activities, such as coloring.

PLAY – Play is an important part of a kindergartner's day. Before kindergarten starts, kids should know how to play with their peers, getting along, and following the rules of the game. A great way to practice this is to simply go to the park and let your kids socialize with other kids their age!
